VU HUU DO

AI & Automation Engineer — Python / LLM APIs

Ho Chi Minh City, Vietnam • +84 347 299 934 • vuhuudo2004@gmail.com • github.com/vuhuudo • linkedin.com/in/vũ-hữu-đô-b899bb360

SUMMARY

AI graduate (Van Lang University) and hands-on automation engineer with 1.5 years at Hoan Cau Group. Builds Python workflows that combine LLM APIs (Gemini) with data processing to automate internal operations — and ships the surrounding software (.NET / React) and infrastructure (Docker, CI/CD, monitoring). Strong at turning messy manual processes into reliable, monitored pipelines.

CORE SKILLS

AI & LLM: Gemini API integration, prompt & workflow design, automation pipelines; AI/ML fundamentals (B.Sc. Artificial Intelligence)
Python: Automation scripts, data processing (Pandas, NumPy), REST API integration, WSL
Data: SQL (T-SQL / PostgreSQL), Excel / MISA data handling, validation pipelines
Software: C# / .NET (ABP Framework), React + TypeScript, REST APIs
Operations: Docker, Linux / WSL, CI/CD (Gitea Actions), Prometheus / Grafana monitoring, backups

PROFESSIONAL EXPERIENCE

Web & Database Developer — Hoan Cau Group

June 2025 – November 2026 · 1 yr 5 mos · Ho Chi Minh City, Vietnam

- Built Python (WSL) + **Gemini API** automation pipelines for internal data extraction and processing, removing repetitive manual work for management teams.
- Automated executive milestone tracking: summarised project progress and produced reporting inputs used directly with the Board of Directors.
- Led the **Base.vn** digital-transformation rollout at the HCM head office and Khanh Hoa branch, standardising workflows and communication.
- Engineered the data pipeline of a multi-company reporting platform: MISA ledger import, parsing and validation across **44 companies**.
- Delivered the surrounding software end-to-end: .NET APIs, React UIs, a central SSO service, and Docker / CI-CD infrastructure with monitoring and backups.

SELECTED PROJECTS

LLM automation pipelines

Python · Gemini API · WSL

- Automated internal data extraction and processing workflows that replace repetitive manual steps for management teams.
- Runs on Linux/WSL alongside the group's internal platforms, with logging for follow-up.

Reporting data pipeline (MISA import)

.NET · SQL Server · Excel / MISA data

- Ledger import, parsing and validation pipeline covering 44 companies with per-row error reporting.

Platform engineering (context)

.NET · React · Docker · CI/CD

- Central OIDC SSO for 5 internal applications; reporting and project-data platforms shipped to production.

EDUCATION & LANGUAGES

Bachelor of Artificial Intelligence — Van Lang University, Ho Chi Minh City (2023 – 2026) · Vietnamese (native) · English (elementary)
