VU HUU DO

Backend Developer — .NET / C#

Ho Chi Minh City, Vietnam • +84 347 299 934 • vuhuudo2004@gmail.com • github.com/vuhuudo • linkedin.com/in/vũ-hữu-đô-b899bb360

SUMMARY

Backend-focused developer with 1.5 years building .NET services at Hoan Cau Group. Designs and ships APIs with ABP Framework / ASP.NET Core, Entity Framework Core and SQL Server — including data-heavy import & validation pipelines and multi-company approval workflows. Strong on authentication & authorization (OpenID Connect / OpenIddict, OAuth2 client credentials, RBAC) and system-to-system integrations; operates what is built with Docker, CI/CD and monitoring.

CORE SKILLS

Backend: C#, .NET (ASP.NET Core), ABP Framework, Entity Framework Core, REST APIs, validation & import pipelines
Auth & Security: OpenID Connect / OAuth2 (OpenIddict), authorization-code + PKCE, client credentials, RBAC, audit logging
Data: SQL Server (T-SQL, schema design, EF Core migrations), PostgreSQL, data validation, Python (Pandas, NumPy)
Integration: Service-to-service APIs, master-data synchronisation, webhooks, user lookup APIs
Quality & Ops: xUnit, CI test gates & security scans, Docker, Linux, Gitea Actions CI/CD, Prometheus / Grafana
Secondary: React + TypeScript, Python + Gemini API automation

PROFESSIONAL EXPERIENCE

Web & Database Developer — Hoan Cau Group

June 2025 – November 2026 · 1 yr 5 mos · Ho Chi Minh City, Vietnam

- Designed and shipped .NET APIs for two production platforms: a **multi-company financial reporting platform** (44 companies — MISA ledger import & validation, approval workflows) and a **construction project data platform** (coordination, member invitations, master-data sync).
- Built the domain, data and API layers: ABP Framework modules, EF Core + SQL Server schemas and migrations, REST endpoints consumed by React SPAs and other systems.
- Implemented authentication & access control: central **OIDC / OpenIddict** service (authorization-code + PKCE, client-credentials service scopes), role-based access, per-application policies, session/audit tracking and admin APIs.
- Delivered integrations: service-to-service APIs (user lookup, application members) and master-data synchronisation between internal systems.
- Own quality & operations: xUnit tests wired into CI, Dockerized deployments across dev / UAT / production, monitoring and backups; automate workflows with Python + Gemini API.

SELECTED PROJECTS

Multi-company financial & fund reporting platform

ABP / .NET · EF Core · SQL Server · Docker

- MISA ledger import & validation pipeline (44 companies), approval workflows and reporting APIs for the React SPA.
- EF Core migrations, multi-company data model and period management.

Central SSO & identity service

ABP / .NET · OpenIddict / OIDC · SQL Server

- OIDC flows (authorization-code + PKCE, client credentials), RBAC, per-application policies, session & audit tracking.
- Service-to-service APIs: user lookup and application members for other systems.

Construction project data platform

ABP / .NET · EF Core · SQL Server · Docker

- APIs for project coordination, member invitations and master-data synchronisation; released to production.

EDUCATION & LANGUAGES

Bachelor of Artificial Intelligence — Van Lang University, Ho Chi Minh City (2023 – 2026) · Vietnamese (native) · English (elementary)
