VU HUU DO

DevOps Engineer — Docker / Linux / CI-CD

Ho Chi Minh City, Vietnam • +84 347 299 934 • vuhuudo2004@gmail.com • github.com/vuhuudo • linkedin.com/in/vũ-hữu-đô-b899bb360

SUMMARY

DevOps-minded engineer with 1.5 years building and running internal platforms at Hoan Cau Group. Operates multiple systems across three environments (dev / UAT / production) on Docker & Linux: CI/CD with Gitea Actions, reverse proxy & TLS, monitoring & alerting (Prometheus / Grafana), scheduled backups and rollback-safe releases. Also develops on the stack (.NET / React), so tooling and pipelines fit the teams' real needs.

CORE SKILLS

Containers & OS: Docker, Docker Compose, Linux (Ubuntu), WSL, Bash

CI/CD: Gitea (self-hosted Git), Gitea Actions pipelines, automated test gates, security scans, versioned releases & rollback

Networking & edge: Nginx, Traefik, Pangolin (reverse proxy / remote access), DNS & TLS, WireGuard (wg-easy) VPN

Observability: Prometheus, Grafana, Alertmanager, node-exporter; health checks & alert design

Data operations: SQL Server on Docker, scheduled backups & restore drills, capacity & cleanup automation

Development: C# / .NET, React + TypeScript, Python + Gemini API automation

PROFESSIONAL EXPERIENCE

Web & Database Developer — Hoan Cau Group

June 2025 – November 2026 · 1 yr 5 mos · Ho Chi Minh City, Vietnam

- Built and operate the delivery platform for multiple internal systems across **three environments (dev / UAT / production)**: Dockerized services, self-hosted registry, CI/CD pipelines in Gitea Actions (build → test gates → security scan → deploy) with rollback-safe releases.
- Run the edge & access layer: reverse proxy (Traefik / Pangolin) with per-application routing and TLS; SSO-protected internal tools; WireGuard VPN access for branches (region mapping).
- Set up observability & reliability: Prometheus + Grafana dashboards and alerts (service health, data blobs, backups, disk), health checks, scheduled backups with restore drills, incident handling and capacity cleanup.
- Operate SQL Server on Docker for several systems: backup/restore, migration runs and monitoring of long-running import jobs.
- Also develop on the stack (.NET / React) and automate workflows with Python + Gemini API; led the Base.vn rollout at HCM head office and Khanh Hoa branch.

SELECTED PROJECTS

Delivery platform & environments

Docker · Gitea Actions · Traefik / Pangolin · Linux

- Three-environment release pipeline for multiple systems: build, automated test gates, security scans, versioned images and rollback.
- Self-hosted registry and configuration/secrets management across environments.

Observability, backups & VPN

Prometheus · Grafana · Alertmanager · WireGuard

- Dashboards and alerts for service health, blob integrity, backups and disk capacity.
- Scheduled SQL Server backups with restore drills; WireGuard VPN (wg-easy) for branch access with region mapping.

Automation & maintenance tooling

Python · Bash · WSL

- Scheduled cleanup and maintenance jobs; Python + Gemini API automations for internal workflows.

EDUCATION & LANGUAGES

Bachelor of Artificial Intelligence — Van Lang University, Ho Chi Minh City (2023 – 2026) · Vietnamese (native) · English (elementary)
