VU HUU DO

Software Engineer — Full Stack & Platform

Ho Chi Minh City, Vietnam • +84 347 299 934 • vuhuudo2004@gmail.com • github.com/vuhuudo • linkedin.com/in/vũ-hữu-đô-b899bb360

SUMMARY

Software Engineer with 1.5 years of hands-on experience delivering and operating enterprise platforms at Hoan Cau Group. Works across the stack: C#/.NET (ABP Framework) APIs, React + TypeScript front-ends, SQL Server, and the Docker/Linux infrastructure with CI/CD and monitoring. Built a central OpenID Connect sign-on service for five internal applications and shipped multi-company reporting and project-data platforms to production. AI graduate; automates workflows with Python + Gemini API.

CORE SKILLS

Languages: C#, TypeScript / JavaScript, Python, SQL (T-SQL), Bash

Frameworks: .NET (ASP.NET Core), ABP Framework, React, Entity Framework Core, REST APIs, Vite

Auth & Data: OpenID Connect / OAuth2 (OpenIddict), RBAC, SQL Server, PostgreSQL, Pandas / NumPy

Infrastructure: Docker, Docker Compose, Linux, WSL, Git / Gitea, CI/CD (Gitea Actions), Nginx, Traefik / Pangolin, Prometheus & Grafana, backup & restore

Practices: Automated testing (xUnit, Vitest, Playwright), code review, technical documentation, rollback-safe releases

AI & Automation: Gemini API integration, Python automation, workflow optimisation

PROFESSIONAL EXPERIENCE

Web & Database Developer — Hoan Cau Group

June 2025 – November 2026 · 1 yr 5 mos · Ho Chi Minh City, Vietnam

- Delivered internal platforms end-to-end — .NET (ABP Framework) APIs, React + TypeScript UIs and SQL Server — including a **multi-company financial reporting platform** (44 companies: MISA ledger import & validation, approval workflows, dashboards) and a **construction project data platform**, both in production.
- Built a central **OpenID Connect (OpenIddict)** sign-on service for **5 internal applications**: SPA flows with PKCE, client-credentials service scopes, role-based access, per-application catalogue & policies, session/location tracking, audit logs and an admin console.
- Operate the full delivery pipeline across **three environments (dev / UAT / production)**: Docker & Linux, CI/CD with Gitea Actions (build, automated test gates, security scans), reverse proxy (Traefik / Pangolin), Prometheus/Grafana alerting, scheduled backups and rollback-safe releases.
- Automate internal data workflows with Python (WSL) + Gemini API, removing repetitive manual processing for management teams.
- Led the Base.vn rollout at the **HCM head office and Khanh Hoa branch**; tracked project milestones and reported progress directly to the Board of Directors.

SELECTED PROJECTS

Multi-company financial & fund reporting platform

ABP / .NET · React · TypeScript · SQL Server · Docker

- Period-based reporting for 44 companies: MISA ledger import & validation, approval workflows, dashboards for accounting teams.
- Three-environment delivery with automated tests, health checks, monitoring and backup/restore.

Central SSO & identity service

ABP / .NET · OpenIddict / OIDC · SQL Server · Docker

- Single sign-on and application catalogue for 5 internal applications; admin console for users, roles, sessions and audit history.
- Service-to-service APIs (user lookup, application members) for access verification and sync.

Construction project data platform

ABP / .NET · React · TypeScript · Docker

- Investor-side project data: coordination workspace, member invitations and master-data synchronisation; released to production.

EDUCATION & LANGUAGES

Bachelor of Artificial Intelligence — Van Lang University, Ho Chi Minh City (2023 – 2026) · Vietnamese (native) · English (elementary)
