VU HUU DO

Frontend Developer — React / TypeScript

Ho Chi Minh City, Vietnam • +84 347 299 934 • vuhuudo2004@gmail.com • github.com/vuhuudo • linkedin.com/in/vũ-hữu-đô-b899bb360

SUMMARY

Frontend-focused developer with 1.5 years building React + TypeScript applications at Hoan Cau Group. Ships data-dense internal UIs — dashboards, tables, multi-step import and approval flows — with clean component structure, vi/en internationalisation and automated test coverage. Integrates SPA authentication with OpenID Connect (authorization-code + PKCE) and works comfortably with the .NET APIs and SQL data behind the UI.

CORE SKILLS

Frontend: React, TypeScript, JavaScript, Vite, HTML5, CSS3, responsive web design, component architecture
UI patterns: Dashboards & data tables, multi-step forms & wizards, i18n (vi/en), theming & branding
Auth: OIDC SPA integration (authorization-code + PKCE), token renewal, session-expiry UX
Testing: Vitest (unit), Playwright (E2E), CI test gates
Backend awareness: REST APIs, .NET / ABP, SQL Server
Tooling: Git / Gitea, Gitea Actions, Docker

PROFESSIONAL EXPERIENCE

Web & Database Developer — Hoan Cau Group

June 2025 – November 2026 · 1 yr 5 mos · Ho Chi Minh City, Vietnam

- Built the React + TypeScript UIs of two production platforms: a **multi-company financial reporting platform** (dashboards, period & company navigation, MISA import and approval flows) and a **construction project data platform** (coordination workspace, member invitations, master-data screens).
- Integrated SPA authentication with the central **OIDC** service (authorization-code + PKCE, silent token renewal, session-expiry handling).
- Delivered UI quality at scale: responsive layouts, vi/en i18n, theming/branding, data-dense tables with sorting and filtering.
- Covered the UI with automated tests — Vitest unit tests and Playwright E2E — wired into CI alongside the .NET APIs.
- Worked full-cycle with .NET APIs and SQL-backed data; automate internal workflows with Python + Gemini API; led Base.vn rollout (HCM HQ, Khanh Hoa branch).

SELECTED PROJECTS

Multi-company financial & fund reporting platform (React SPA)

React · TypeScript · Vite · REST APIs

- Dashboards and data-dense tables for 44 companies; period & company navigation; MISA import and approval flows.
- vi/en internationalisation, theming and responsive layouts; Vitest + Playwright coverage.

Central SSO — SPA integration

OIDC (PKCE) · React · TypeScript

- Authorization-code + PKCE flow, silent token renewal and session-expiry UX for internal SPAs.

Construction project data platform (React UI)

React · TypeScript · Vite

- Coordination workspace, member invitations and master-data screens; released to production.

EDUCATION & LANGUAGES

Bachelor of Artificial Intelligence — Van Lang University, Ho Chi Minh City (2023 – 2026) · Vietnamese (native) · English (elementary)
