SUMMARY

Full Stack Developer with 1.5 years of hands-on experience building and operating enterprise platforms at Hoan Cau Group. Delivers end-to-end across .NET (ABP Framework), React + TypeScript, SQL Server and the Docker/Linux infrastructure with CI/CD and monitoring. Built a central OpenID Connect sign-on service for five internal applications; shipped reporting and construction-data platforms to production. AI graduate (Van Lang University).

EDUCATION

Bachelor of Artificial Intelligence
Van Lang University
2023 - 2026

LANGUAGES

Vietnamese: Native

English: Elementary

SOFT SKILLS

- Self-learning & adaptable
- Teamwork & collaboration
- Technical problem-solving
- Clear written communication

PROFESSIONAL EXPERIENCE

Web & Database Developer — HOAN CAU GROUP

June 2025 - November 2026 (1 yr 5 mos) · Ho Chi Minh City, Vietnam

- **Full-stack development:** Designed and built internal platforms end-to-end — ABP Framework (.NET / C#) APIs, React + TypeScript UIs and SQL Server — including a **group financial & fund reporting platform** (period-based reporting for 44 companies: MISA ledger import & validation, multi-company approval workflows, dashboards) and a **construction project data platform**, both shipped to production.
- **Identity & SSO:** Built a centralised **OpenID Connect (OpenIddict)** sign-on service for **5 internal applications**: authorization-code + PKCE for SPAs, client-credentials service scopes, role-based access, per-application catalogue & policies, session/location tracking by region, audit logs and an admin console.
- **DevOps & delivery:** Own the release pipeline of all systems across **three environments (dev / UAT / production)**: Docker & Linux, CI/CD with Gitea Actions (build, automated test gates, security scans), reverse proxy (Traefik / Pangolin), Prometheus/Grafana alerting, scheduled backups, rollback-safe releases.
- **AI & automation:** Automated internal data workflows with Python (WSL) + Gemini API, removing repetitive manual processing for management teams.
- **Digital transformation:** Led the Base.vn rollout at the **HCM head office and Khanh Hoa branch**; tracked project milestones and reported progress directly to the Board of Directors.

SELECTED PROJECTS

Group financial & fund reporting platform

ABP / .NET · React · TypeScript · SQL Server · Docker

- Period-based reporting for **44 companies**: MISA ledger import & validation, approval workflows, dashboards for accounting teams.
- Three-environment delivery with automated tests, health checks, monitoring and backup/restore procedures.

Central SSO & identity service

ABP / .NET · OpenIddict / OIDC · SQL Server · Docker

- Single sign-on and application catalogue for **5 internal applications**; admin console for users, roles, sessions and audit history; access policies & alerts.
- Service-to-service APIs (user lookup, application members) for access verification and synchronisation across systems.

Construction project data platform

ABP / .NET · React · TypeScript · Docker

- Investor-side project data: coordination workspace, member invitations and master-data synchronisation; released to production.

TECHNICAL SKILLS

Backend:	C#, .NET (ASP.NET Core), ABP Framework, EF Core, REST APIs, OpenID Connect / OAuth2 (OpenIddict), RBAC
Frontend:	React, TypeScript, JavaScript, Vite, HTML5, CSS3, responsive web design
Databases:	SQL Server (T-SQL, EF Core migrations), PostgreSQL, data processing (Python, Pandas, NumPy)
DevOps & Infra:	Docker, Docker Compose, Linux, WSL, Git / Gitea, CI/CD (Gitea Actions), Nginx, Traefik/Pangolin, Prometheus & Grafana, backup & restore, Bash
AI & Automation:	Gemini API integration, Python automation, workflow optimisation
Testing:	xUnit, Vitest, Playwright (automated CI gates)
