VU HUU DO

Full Stack Developer — .NET / React

Ho Chi Minh City, Vietnam • +84 347 299 934 • vuhuudo2004@gmail.com • github.com/vuhuudo • linkedin.com/in/vũ-hữu-đô-b899bb360

SUMMARY

Full Stack Developer with 1.5 years of hands-on experience building and operating enterprise platforms at Hoan Cau Group. Delivers end-to-end: .NET (ABP Framework) APIs, React + TypeScript front-ends, SQL Server data layers, and the Docker/Linux infrastructure with CI/CD and monitoring they run on. Built a central OpenID Connect sign-on service for five internal applications, and shipped multi-company reporting and construction-data platforms to production. AI graduate focused on turning manual business processes into reliable software.

CORE SKILLS

Backend: C#, .NET (ASP.NET Core), ABP Framework, Entity Framework Core, REST APIs, OpenID Connect / OAuth2 (OpenIddict), role-based access control

Frontend: React, TypeScript, JavaScript, Vite, HTML5, CSS3, responsive web design

Databases: Microsoft SQL Server (T-SQL, EF Core migrations), PostgreSQL, data processing (Python, Pandas, NumPy)

DevOps & Infrastructure: Docker, Docker Compose, Linux, WSL, Git / Gitea, CI/CD (Gitea Actions), Nginx, Traefik / Pangolin, Prometheus & Grafana, backup & restore, Bash

AI & Automation: Gemini API integration, Python automation, workflow optimisation · **Testing:** xUnit, Vitest, Playwright (automated CI gates)

PROFESSIONAL EXPERIENCE

Web & Database Developer — Hoan Cau Group

June 2025 – November 2026 · 1 yr 5 mos · Ho Chi Minh City, Vietnam

- **Full-stack development:** Designed and built internal platforms end-to-end — ABP Framework (.NET / C#) APIs, React + TypeScript UIs and SQL Server — including a **group financial & fund reporting platform** (period-based reporting for 44 companies: MISA ledger import & validation, multi-company approval workflows, dashboards) and a **construction project data platform**, both shipped to production.
- **Identity & SSO:** Built a centralised **OpenID Connect (OpenIddict)** sign-on service for **5 internal applications**: authorization-code + PKCE for SPAs, client-credentials service scopes, role-based access, per-application catalogue & access policies, session/location tracking by region, audit logs and an admin console.
- **DevOps & delivery:** Own the release pipeline of all systems across **three environments (dev / UAT / production)** on Docker & Linux: CI/CD with Gitea Actions (build, automated test gates, security scans), reverse proxy (Traefik / Pangolin), Prometheus/Grafana alerting, scheduled backups and rollback-safe releases.
- **AI & automation:** Automated internal data workflows with Python (WSL) + Gemini API, removing repetitive manual processing for management teams.
- **Digital transformation:** Led the Base.vn rollout at the **HCM head office and Khanh Hoa branch**; tracked project milestones and reported progress directly to the Board of Directors.

SELECTED PROJECTS

Group financial & fund reporting platform

ABP / .NET · React · TypeScript · SQL Server · Docker

- Period-based reporting for **44 companies**: MISA ledger import & validation, approval workflows and dashboards for accounting teams.
- Three-environment delivery with automated tests, health checks, monitoring and backup/restore procedures.

Central SSO & identity service

ABP / .NET · OpenIddict / OIDC · SQL Server · Docker

- Single sign-on and application catalogue for **5 internal applications**; admin console for users, roles, sessions and audit history; access policies & alerts.
- Service-to-service APIs (user lookup, application members) used by other systems to verify and synchronise access.

Construction project data platform

ABP / .NET · React · TypeScript · Docker

- Investor-side project data: coordination workspace, member invitations and master-data synchronisation; released to production.

EDUCATION & LANGUAGES

Bachelor of Artificial Intelligence — Van Lang University, Ho Chi Minh City (2023 – 2026) · Vietnamese (native) · English (elementary)
