VU HUU DO

Full Stack Developer — .NET / React

Ho Chi Minh City, Vietnam • +84 347 299 934 • vuhuudo2004@gmail.com • github.com/vuhuudo • linkedin.com/in/vũ-hữu-đô-b899bb360

SUMMARY

Full Stack Developer with 1.5+ years of hands-on experience building and operating enterprise platforms at Hoan Cau Group. Works end-to-end: .NET (ABP Framework) APIs, React + TypeScript front-ends, SQL Server data layers, and the Linux/Docker infrastructure with CI/CD and monitoring they run on. Experienced with OpenID Connect single sign-on (OpenIddict) and Python + Gemini API automation. AI graduate focused on turning manual business processes into reliable internal products.

CORE SKILLS

Backend: C#, .NET (ASP.NET Core), ABP Framework, REST APIs, OpenIddict / OpenID Connect, Entity Framework Core

Frontend: React, TypeScript, JavaScript, HTML5, CSS3, responsive web design

Databases: Microsoft SQL Server, PostgreSQL, data processing with Python (Pandas, NumPy)

DevOps & Infrastructure: Docker, Docker Compose, Linux, WSL, Git, CI/CD (Gitea Actions), reverse proxy (Traefik, Pangolin), Prometheus & Grafana monitoring, backup & restore, Bash

AI & Automation: Gemini API integration, Python automation, workflow optimisation

PROFESSIONAL EXPERIENCE

Web & Database Developer — Hoan Cau Group

June 2025 – Present · Ho Chi Minh City, Vietnam

- Build and operate internal platforms end-to-end — ABP Framework (.NET) APIs, React + TypeScript UIs and SQL Server — including **HCG EPM** (group financial & fund reporting) and **HCG CDE** (construction project data).
- Developed **MagicAuth / HCG ID**, a centralised OpenID Connect single sign-on service for internal applications (HCG EPM, Master Data, CDE, CloudBeaver): role-based access, per-application catalogue, session & audit logs, and service APIs for other systems.
- Own the delivery pipeline: three environments (dev / UAT / production) on Docker & Linux with CI/CD (Gitea Actions), automated test gates, health checks, Prometheus/Grafana alerting, scheduled backups and rollback-safe releases.
- Automate internal data workflows with Python (WSL) + Gemini API, removing repetitive manual processing for management teams.
- Led the Base.vn rollout across regional branches; track key project milestones and report progress directly to the Board of Directors.

SELECTED PROJECTS

HCG EPM — Group financial reporting platform

ABP / .NET · React · TypeScript · SQL Server · Docker

- Period-based reporting platform: MISA ledger import & validation, multi-company approval workflows and dashboards used by the group's accounting teams.
- Runs on a monitored three-environment setup with automated tests, health checks and backup/restore procedures.

MagicAuth (HCG ID) — Identity & SSO service

ABP / .NET · OpenIddict / OIDC · SQL Server

- Central single sign-on and application catalogue for the group's internal apps, with an admin console for users, roles, sessions and audit history.
- Service-to-service APIs (user lookup, application members) that let other systems verify and synchronise access.

HCG CDE — Construction project data platform

ABP / .NET · React · TypeScript · Docker

- Investor-side project data: coordination workspace, member invitations and master-data synchronisation across systems.

EDUCATION

Bachelor of Artificial Intelligence — Van Lang University, Ho Chi Minh City (2023 – 2026)

LANGUAGES

Vietnamese (native) · English (elementary)
