SUMMARY

Full Stack Developer & Artificial Intelligence graduate with 2 years of practical experience at Hoan Cau Group. Core expertise in web development, database server management, system digitization, and workflow automation combining Python and Gemini API. Proficient in full-stack architecture, Linux/Docker/WSL environments, and deploying scalable enterprise management platforms.

EDUCATION

Bachelor of Artificial Intelligence
Van Lang University
2023 - 2026

LANGUAGES

Vietnamese: Native / Bilingual

English: Elementary

SOFT SKILLS

- Easily Adaptable
- Teamwork & Collaboration
- Self-Learning
- Technical Problem-Solving

PROFESSIONAL EXPERIENCE

Web and Database Developer — HOAN CAU GROUP

June 2025 - August 2026 (1 year 3 months) | Ho Chi Minh City, Vietnam

- **Full Stack & Web Development:** Developed internal web applications and management platforms to support enterprise operations.
- **Digital Transformation & System Digitization:** Spearheaded the digitization of internal operations across regional branches, deploying Base.vn to standardize workflows and corporate communications.
- **Server & Database DevOps:** Built and configured database servers from the ground up. Executed DevOps duties including server maintenance, Docker containerization, and working in Linux/WSL environments.
- **AI & Automation Integration:** Engineered custom Python automation scripts running in WSL integrated with Gemini API to optimize internal data processing pipelines.
- **Executive Milestone Tracking:** Tracked key project milestones and presented progress summaries directly to the Board of Directors.

PROJECTS

Enterprise Workflow Automation System — HOAN CAU GROUP

- Built AI-driven automation pipelines combining Python, WSL, and Gemini API for automated data extraction and workflow optimization.
- Reduced repetitive manual data tasks by streamlining executive tracking processes.

Enterprise Operations Digitization (Base.vn) — HOAN CAU GROUP

- Led cross-branch digitization initiative using Base.vn platform to standardize internal communication workflows.
- Established centralized monitoring tools and milestone reporting for executive stakeholders.

Database & DevOps Server Infrastructure — HOAN CAU GROUP

- Designed and configured high-performance database servers from scratch.
- Implemented Docker containerization for scalable deployment across Linux and WSL environments.

TECHNICAL SKILLS

Frontend:	HTML5, CSS3, JavaScript/TypeScript, Responsive Web Design, Web Interfaces
Backend & APIs:	Python (Advanced), RESTful APIs, Node.js/Express, Gemini API Integration
Databases:	PostgreSQL, MySQL, Database Server Configuration, Data Processing (Pandas, NumPy)
DevOps & Server:	Docker, Linux, WSL, Server Administration, Git, System Automation
Specializations:	Digital Transformation, System Digitization, Workflow Automation
